Prevenire e' meglio che curare. Parola di Mini Press.

Mini Press e' nata nel 1991 con un obiettivo chiaro e preciso: risolvere il problema del controllo della pressione e del monitoraggio dei fluidi negli impianti oleodinamici.

Dopo una lunga esperienza nel settore, Dario Corsi, fondatore dell'Azienda, ha affrontato una delle principali cause di inefficienza del macchinario mobile: il buon funzionamento di macchine estremamente complesse e costose poteva essere ostacolato da un banale problema di riduzione o modifica della pressione dei fluidi. La soluzione piu' ovvia, ma non per questo la piu' scontata, e' stata quella di mettere

Dario e Davide Corsi

a punto uno specifico sistema diagnostico che potesse garantire, in qualsiasi momento, luogo e condizione (anche la piu' estrema), la verifica immediata della pressione all'interno dell'impianto, senza interromperne l'attivita'. In quasi venticinque anni di attivita', Mini Press, perfezionando il proprio sistema diagnostico, ha saputo raccogliere l'attenzione e il favore dei costruttori piu' accorti diventando, nel settore, uno dei principali e piu' qualificati produttori al mondo.

Il sistema Mini Press, impiantato all'origine, offre la migliore garanzia di efficienza, sicurezza e durata per tutte le macchine su cui viene installato.

Se la migliore cura e' la prevenzione, i prodotti e il sistema diagnostico di Mini Press sono un'ottima soluzione per evitare inconvenienti di funzionalita' e costosi interventi di riparazione elevando, contemporaneamente, lo standard qualitativo e prestazionale delle vostre macchine.

Prevention is better than cure. The Mini Press philosophy.

Mini Press aim and mission, ever since it was founded in 1991, has been one and one only: solving the problem of pressure control and monitoring fluids inside hydraulic systems.

After a life long experience in the field, Mr Dario Corsi, the company founder, decided to tackle one of the most common causes of mobile machineries inefficiency: the proper functioning of even the most complex and expensive machines could be thwarted or hindered by a sudden and simple reduction or change in the fluid pressure. The most obvious solution to this problem, but not the simplest, was to create a specific testing system that would allow the immediate control of the pressure inside the machine, without stopping its functioning, at any moment of the working process, in any place, or under any conditions (even the most extreme).

In almost twentyfive years of activity, Mini Press has been able to establish itself as one of the major and most qualified producers of hydraulic testing equipment in the world. All of this was achieved through hard work at refining and improving its testing system, and by catching the attention and finding favour with the most attentive and significant manufacturing companies. Mini Press testing method, devised in-house, guarantees efficiency, safety and endurance for all the machines to which it is installed at construction.

If prevention is always better than cure, Mini Press products and diagnostic testing method are excellent for avoiding any future malfunctioning and expensive repairs and at the same time they can increase the quality and the performance of your machines.

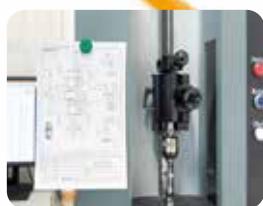

Qualita', efficienza e rapidita' delle forniture.

Il nuovo "quartier generale" di Mini Press si sviluppa nella provincia bolognese, in Emilia, nel cuore della "valle dell'oleodinamica" italiana. L'organizzazione si e' qui dotata di nuove tecnologie produttive e di controllo ad altissima qualita' che, unitamente all'esperienza maturata nel tempo, le permettono di offrire un prodotto e un servizio apprezzati in tutto il mondo.

La soddisfazione del cliente e' da sempre, il nostro obiettivo primario. E' per questo motivo che oggi, chiunque ci conosca, sa che Mini Press non e' solo un ottimo produttore di sistemi diagnostici ma, soprattutto e'un vero e proprio partner commerciale di cui ci si puo', sempre e comunque, fidare.

Quality, efficiency and speed in supplying.

Mini Press new "headquarters" are based in Bologna area, located in Emilia, the heart of the Italian "hydraulic valley". The new location is equipped with the latest technologies for production and the highest quality control. All of this, along with the experience gained over the years, enables Mini Press to offer products and service valued worldwide. Customer's satisfaction has always been our main aim and whoever knows us is well aware that not only are we excellent producers of pressure testing systems but above all Mini Press is a true business partner, on whom one can always rely on.

"Rapid System", il piu' perfetto sistema di diagnostica per impianti oleodinamici.

Con tutta l'esperienza e il know-how di cui dispone, Mini Press ha messo a punto "**Rapid System**", una gamma completa di componenti miniaturizzati che consentono di monitorare ogni singolo sistema, localizzando tempestivamente il problema e impedendo l'insorgenza di altre complicazioni. "**Rapid System**" puo' essere utilizzato nelle fasi di collaudo, nelle operazioni di spуро, di prelievo di campioni di fluido, nella manutenzione e nell'assistenza senza interrompere l'attivita' dell'impianto. Il sistema, riducendo notevolmente gli interventi sulle macchine, permette un considerevole risparmio di tempo e risorse, aumentando nel contempo la sicurezza per l'utilizzatore finale. "**Rapid System**" è l'unica soluzione che, al momento, permette un controllo realmente affidabile degli impianti oleodinamici, incrementando il valore intrinseco delle macchine su cui viene installato.

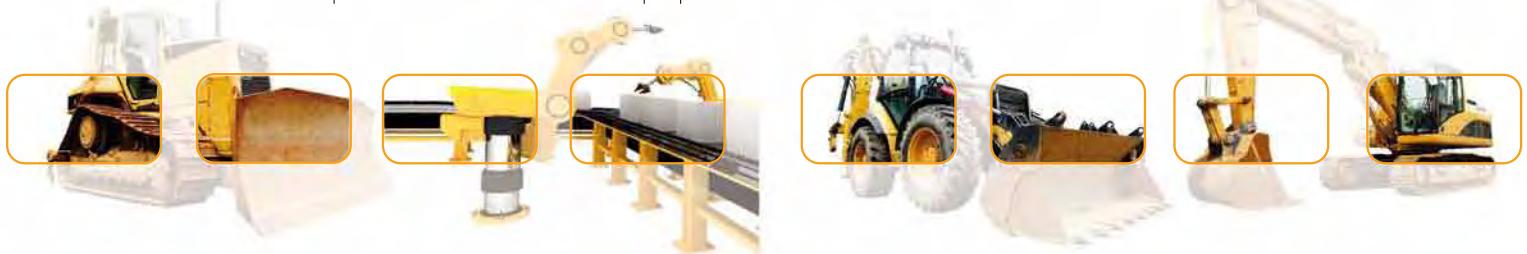

"Rapid System", the most perfect diagnostic system for hydraulic plants.

With all its experience and know-how, Mini Press created and finely tuned "**Rapid System**", a complete range of miniaturized components which allow a constant monitoring and immediate control on any hydraulic equipment. By localizing immediately any problem in the system it avoids any further complications. "**Rapid System**" can be used at any time during the phases of testing, bleeding, fluid sampling, maintenance and assistance, without stopping the functioning of the plant. Thus reducing the amount of time and resources spent on servicing the machines, and at the same time further insures the operators' safety.

"**Rapid System**" is the only solution that enables a reliable and effective control of hydraulics plants and at the same time increases the intrinsic value of the machine to which it is installed.

A disposizione di un mondo di costruttori.

I prodotti e i sistemi Mini Press possono essere applicati a qualsiasi tipo di macchinario mobile. Una fitta rete di rivenditori puo' garantire la fornitura alle Aziende costruttrici di tutti i principali settori (agricolo, industriale, edile e dei trasporti) e in tutti i Paesi del mondo. L'incredibile rapporto costo/benefici dei prodotti Mini Press puo' mettere qualsiasi costruttore nelle condizioni di elevare notevolmente gli standard qualitativi e di sicurezza delle proprie macchine.

At the Manufacturer's service.

Mini Press products and systems can be applied to any type of mobile machine. With our comprehensive distribution network, we can supply everywhere in the world, in all the main sectors: agricultural, industrial, building construction or transport and in each sector the manufacturer can increase the quality and safety of their machines, thanks to the amazing cost/benefits ratio of our products.

I nostri prodotti. Our products.

Miniprese prova pressione

Test couplings for pressure control

Tubo capillare alta pressione e raccordi

High pressure micro-hose and fittings

Strumenti di controllo digitali

Digital instruments for Pressure testing

Strumenti portatili prova pressione

Portable pressure test kits

Manometri

Pressure gauges

Rubinetti esclusori per protezione manometro

Anti-shock valves for gauges protection

Misuratori di portata in linea

High pressure in-line flow indicators

Pressa idraulica per microtubi

Hdraulic crimping machine for microhoses

Mini Press nel mondo.

Mini Press fornisce ed assiste i propri clienti, direttamente o attraverso concessionari di fiducia, nei principali mercati a livello mondiale:

Argentina, Australia, Austria, Belgio, Bulgaria, Chile, Cina, Danimarca, Dubai, Egitto, Francia, Germania, Gran Bretagna, Grecia, India, Irlanda, Islanda, Israele, Libano, Nuova Zelanda, Olanda, Polonia, Portogallo, Rep. Ceca, Romania, Russia, Scandinavia, Slovacchia, Slovenia, Spagna , Stati Uniti, Sud Africa, Svizzera, Tunisia, Turchia.

Mini Press Worldwide.

Mini Press supply products and assistance to its customers in the main markets around the World, directly or through appointed agents and distributors:

Argentina, Australia, Austria, Belgium, Bulgaria, Chile, Czech Republic, Denmark, Dubai, Egypt, France, Germany, Great Britain, Greece, Holland, Iceland, India, Ireland, Israel, Lebanon, New Zealand, Poland, Portugal, Romania, Russia, Scandinavia, Slovakia, Slovenia, Spain, South Africa, Switzerland, U.S.A, Tunisia, Turkey.

- 2 Miniprese prova pressione
Test couplings for pressure checking

- 16 Tubo capillare per alta pressione e raccordi
Micro hose for high pressure and fittings

- 35 Strumenti di controllo digitali
Digital instruments for pressure testing

- 37 Strumenti portatili prova pressione
Portable hydraulic instruments for pressure testing

- 39 Manometri
Pressure gauges

- 40 Rubinetti esclusori protezione manometro
Pressure gauge anti-shock valves

- 42 Misuratori di portata in linea
High pressure in-line flow indicators

- 43 Pressa idraulica per microtubi
Hydraulic crimping machine for microhoses

Applicazioni:

- Controllo pressione
- Lubrificazione
- Spurgo aria
- Prelievo campioni olio

Materiale:

Acciaio al carbonio zincato
(Acciaio inox AISI 316, disponibile su richiesta)

Guarnizioni:

NITRILE BUNA N (NBR)
(VITON, disponibili su richiesta)

Temperatura di esercizio:

-30°C...+125°C (NITRILE)

-25°C...+230°C (FKM)

Fluidi:

Olio idraulico
Olio a base minerale
Compatibilità con altri fluidi a richiesta

Applications:

- Pressure control
- Lubrification
- Air bleeding
- Oil sampling

Materials:

Galvanised carbon steel
(Stainless steel AISI 316 is available on request)

Sealing:

NITRILE BUNA N (NBR)

FKM – VITON (on request)

Working temperature:

-30°C...+125°C (NITRILE BUNA N)

-25°C...+230°C (FKM)

Esecuzione dei fori filettati e tipi di tenuta

Hole screw-cuts and sealing types

Come ordinare
How to order

Per ordinare i componenti indicare il codice riportato nelle tabelle per ogni configurazione indicando l'eventuale lettera attribuita all'opzione desiderata.

Please indicate the code shown in the required form chart, and add, if necessary, the letter of the chosen option.

Configurazione / Form
Tappo metallo con catenella e sistema interno di tenuta a sfera
Metal cap with chain and ball sealing system
 Eliminare "S1" nel codice / Delete "S1" in the ref.

 XXXXXXXX

 Tappo/Cap: Lettera "C" nel codice / "C" in the ref.

 XXXXXXXX

Tappo metallo con catenella e sistema interno di tenuta a pistone
Metal cap with chain and poppet valve sealing system
 Lasciare "S1" nel codice / Put "S1" in the ref.

 S1XXXXXX

 Tappo/Cap: Lettera "C" nel codice / "C" in the ref.

 S1XXXXXX

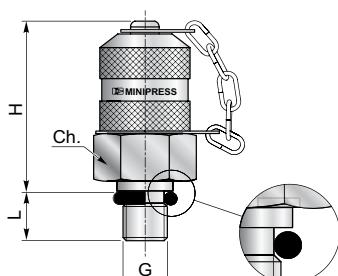

Opzioni / Options

O
Tappo metallo. laccio in plastica / Metal cap with plastic binder
 Sostituire nel codice "C" con "0" / Replace "C" with "0"

 XXXXXXXX

P
Tappo in plastica / Plastic cap
 Sostituire nel codice "C" con "P" / Replace "C" with "P"

Innesto rapido + minipresa 15QC000C

Test quick coupling + test point 15QC000C

Innesto rapido attraverso il quale è possibile controllare i parametri della pressione dell'olio in un impianto oleodinamico grazie ad una minipresa (con filetto esterno 16x2 per attacco F in microtubo) avvitata su di esso.

Intercambiabile con altre miniprese a norma ISO 15171-1.

Norma: ISO 15171-1

Applicazione: diagnostica impianti oleodinamici

Pressione di esercizio: 400 bar

Materiale: acciaio zincato

Tenuta: NBR (da -30° a + 125°C)

Diagnostic quick coupling gives the opportunity to control the parameters of high-pressure oil hydraulic systems. Socket part has a test point thread M16x2 for micro hose. Interchangeable with other ISO 15171-1.

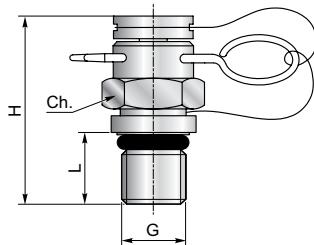

Norm: ISO 15171-1

Application: diagnostic of hydraulic systems

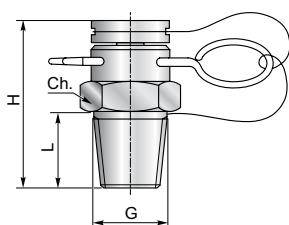

Working pressure: 400 bar

Material: zinc steel

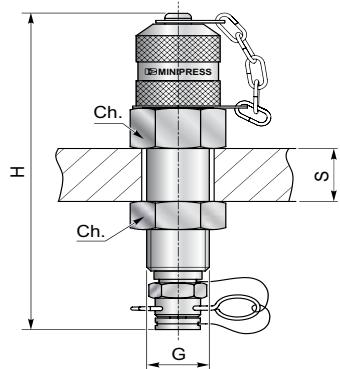

Seal: NBR (from -30°C to +125°C)

Minipresa con innesto a baionetta
Plug-in test coupling

Parapolvere protettivo per boccola in plastica per raccordi RD2 e RD4

Ferrules anti-dust cap for RD2 and RD4 fittings

| |
|-------------|
| Codice/Ref. |
| 32CS0000 |
| 32CS0004 |

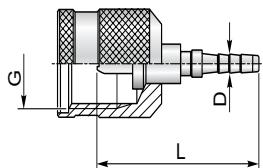

I tubi capillari RD2 e RD4 raccordati sono sempre dotati di parapolvere 32CP000X e/o 32CS000X. In

caso di acquisto di raccordi sciolti, 32CP000X e/o 32CS000X sono inclusi nel codice del raccordo.

Fitted micro hoses RD2 and RD4 are always complete with anti-dust caps 32CP000X and/or 32CS000X. In case of purchase of loose fittings, 32CP000X and/or 32CS000X are included in fitting part number.

SERVICEMAN PLUS*

- Funzionalità Plug & Play con riconoscimento automatico dei sensori, basta inserire il sensore desiderato e iniziare a misurare.
- Ampio display retroilluminato per una facile e rapida lettura anche in condizioni di luce scarsa.
- Diagnostica semplificata grazie alla memorizzazione dei valori MIN/MAX e alla visualizzazione diretta della pressione differenziale o della potenza idraulica.
- Guida all'uso semplice e chiara.

SERVICEMAN PLUS*

- "Plug & Play" using automatic sensor recognition, simply plug in and measure.
- Large back-lit display for quick and secure reading, even under difficult conditions.
- Simply troubleshooting using MIN/MAX memory and direct display of differential pressure or hydraulic performance.
- Simply and clear user prompts.

* Available in CAN Bus or analogue version, sensors and flow meters to be added to basis kit.

Strumenti portatili prova pressione
Portable hydraulic instruments for pressure testing

MINIPRESS
DIAGNOSTIC SYSTEMS

Le valigette prova pressione sono predisposte per il collegamento tramite raccordi avvitabili standard M 16x2 e tubo capillare flessibile.

I manometri sono a molla Bourdon con riempimento di liquido (glicerina 99.7%).

Classe di precisione (sul valore di fondo scala): 1% per i manometri diam. 100 mm e 1.6% per i manometri diam. 63 mm secondo NORMA DIN 16005.

Per ogni valigetta è possibile scegliere il fondo scala di ogni singolo manometro da includere all'interno della stessa. Ogni kit è corredato di tubo capillare flessibile Rapid System di mt 2 raccordato femmina 16x2 per minipresa.

Scale disponibili: -1...0 - 0,6 - 1 - 1,6 - 2,5 - 4 - 6 - 10 - 16 - 25 - 40 - 60 - 100 - 160 - 250 - 315 - 400 - 600 - 1000.

Test kits are made for connecting any hydraulic equipment with standard threaded test couplings M 16x2 and fitted micro-hose.

Pressure gauges are fitted with a Bourdon spring and liquid filled (glycerine 99.7%), according to DIN 16005.

Ø 100 mm accuracy 1%.
Ø 63 mm accuracy 1.6%.

Each kit is supplied with a fitted female 16x2 2 metre micro hose and gauges chosen from these ranges, in bar:

-1...0 - 0,6 - 1 - 1,6 - 2,5 - 4 - 6 - 10 - 16 - 25 - 40 - 60 - 100 - 160 - 250 - 315 - 400 - 600 - 1000.

I misuratori di portata sono progettati per rilevazioni continue o uso discontinuo.

L'ampio diametro di 63mm dello strumento di lettura analogico assicura controlli rapidi per monitorare le prestazioni di pompe idrauliche e per settare valvole di controllo del flusso.

Possono essere utilizzati su impianti idraulici fissi e mobili, ma anche su sistemi di lubrificazione e raffreddamento e su equipaggiamenti per l'erogazione di acqua e acqua-olio.

Per le loro caratteristiche i misuratori di portata possono essere utilizzati in condizioni avverse o in applicazioni dove non è possibile attingere all'energia elettrica.

Inoltre è possibile misurare la temperatura, tramite il termometro e la pressione, grazie alla predisposizione per la connessione con una minipresa da 1/4" G.

Flow indicators are designed for continuos monitoring or intermittent use commissioning.

The large clear 63mm diameter dial ensure that quick checks can be made to determine pump performance and setting of flow control valves.

They can be used on mobile and industrila hydraulic circuits. Also lubrication and coolant system using oil/water.

These direct actinng flow indicators can be installed in hazardous areas or on applications were no power is available.

Moreover it is possible to check the temperature by the thermometer and the pression by the predisposition for the connection with a 1/4" G test coupling.

A) POTENZA DI PRESSATURA: 100 Tonnellate

B) DIAMETRO MAX DI PRESSATURA: 46mm con set di morsetti

C) RANGE DI PRESSATURA (mm) : 6,5 - 30

D) APERTURA MORSETTI: +20mm

E) APERTURA SENZA MORSETTI: 59mm

F) DIMENSIONI: 200X300h.330

G) PESO: Kg. 24

H) SICUREZZA: Conforme alle norme CE

Nono graduato con spia luminosa per segnalare il diametro di pressatura raggiunto.

A) SWAGING STRENGTH: 100 Tons

B) MAXIMUM CRIMPING DIAMETER: 46 mm including dies set

C) CRIMPING RANGE (mm): 6,5 – 30

D) MAXIMUM OPENING OF DIES SET: +20mm

E) MACHINE MAXIMUM OPENING WITHOUT DIES SET: 59mm

F) DIMENSIONS: 200X320Xh.330mm

G) WEIGHT: Kg. 24

H) SAFETY: Conforms To CE Standards

Graduated vernier with control light indicating the achievement of the required crimping diameter.

La pressa è una macchina robusta e leggera, studiata per essere facilmente trasportabile sul posto di lavoro; ideale per la graffatura di tubi flessibili impiegati nei circuiti oleodinamici. Non necessita di particolare manutenzione, a parte una periodica lubrificazione.

Codice prodotto completo di set di morsetti per pressatura microtubi **RD2-3-4: O100M+6,5**

The machine is sturdy, lightweight and designed to be easily carried in work site; ideal for swaging hoses for hydraulic systems. It does not require any special maintenance, except for a periodic lubrication.

*Item part number complete with set of clamps to crimp **RD2-3-4 micro hoses: O100M+6,5***
